Polygraph Professional Suite™

FingerCuff™

Limestone Technologies' FingerCuff™ is capable of producing an exact measurement of blood volume changes without any discomfort to the examinee. Record and display the FingerCuff™ and traditional blood pressure cuff physiology at the same time. Limestone Technologies is the first company to offer a FingerCuff™ that provides results with digital polygraph instrumentation.
ChartStacker™

Limestone Technologies' ChartStacker™ is a software utility that allows examiners to conveniently stack their polygraph charts simultaneously for direct analysis. ChartStacker™ is the ultimate global scoring tool. Our chart analysis innovation makes global scoring easier than ever. Obtain relevant information at a glance.

Automatic Measurement Feature

This time saving utility measures the examinee's physiological responses with the click of a button. Precision measurements can be automatically calculated and marked on the chart for you. Now you can quickly measure and record physiology from question onset, offset or response. Measurement variables include amplitude, cardio amplitude or line length. Record results in imperial or metric units directly on the chart. Make your manual scoring seem effortless.

Color Coded Question Types

Limestone Technologies' Polygraph Professional Suite™ makes it easy to identify question types with our easy to read chart annotations. Clearly classify question types with our improved chart marking technique.

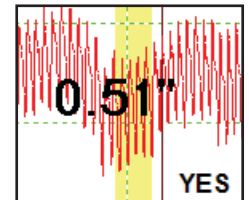

Polygraph Professional Suite™

- •Polygraph Professional Suite™ unlimited use software license
- •Limestone's DataPac_USB™ 8 channel data acquisition system
- •2 Respiration Pneumatic Transducers
- •1 complete set of EDA electrodes. We include both traditional metal and wet-gel electrodes
- •1 package of 100 disposable wet-gel EDA electrodes
- •1 pneumatic blood pressure cuff complete with palm sphygmomanometer
- •1 StingRay SE™ piezo electronic countermeasure cushion
- •1 exclusive Limestone FingerCuff™. An alternative to the Blood Pressure Cuff
- •1 hardcopy user's manual as well as an upgradeable software manual
- •Limestone's virtual tutorials on CD-ROM. A step-by-step guide to your new polygraph
- •1 OSS 1 & 2 scoring algorithms, courtesy of Donald Krapohl and Barry McManus

See for yourself

Multi-Language Platform

Polygraph Professional Suite™ software supports a multi-language platform. Special attention has been given to ensure that our software can be made available in several languages without requiring any additional CDs or software versions. Our clients can select their desired language at installation and the software will install appropriately. The software is currently available in English, Spanish and French. The ability to switch between languages after Polygraph Professional Suite™ has been installed is exclusive to Limestone Technologies Inc.
ChartSync+™

Limestone Technologies' ChartSync+™ utility now incorporates the latest Windows Media video and audio formats for a perfect balance of compression and quality. Complete polygraph interview audio/video can be synchronized to the examinee's physiology over multiple videos or even across multiple audio recordings. With our new streamlined recording process examiners can concentrate on the test, not the software. Limestone Technologies was the first company to offer fully integrated audio/video recording.
Scoring Algorithms

Polygraph Professional Suite™ includes the following scoring algorithms:
- Rank Scoring System (RSS)
- Objective Scoring System (OSS) Versions 1, 2, and 3
- Concealed Information Test (CIT)
- Peak of Tension Test (POT)

Fully integrated CDR/DVD recording tools

Limestone Technologies was the first polygraph company to offer CDR/DVD software controls that are completely integrated into the Polygraph Professional Suite software. Limestone Technologies is not dependant on OEM or unsupported third party solutions. Polygraph Professional Suite clients have our assurance that we will support the recording software tools that we have created.
